

ALLIED HEAT TRANSFER

OIL COOLERS air cooled

We have the very best cooling you need at the very best prices !!

Note : You may get inferior product at cheaper prices but **Not all coolers are created equal** for example you wouldn't put a low pressure hydraulic cooler on a high pressure compressor circuit or a cooler made for indoor clean environment on a drill rig or a farm seeder. Let us choose the best cooler for you and compare our prices.

Large stockholding

Complete cooling systems with fan & motor or cooler only

Standard duty aluminium coolers

Heavy duty aluminium coolers

Extreme duty steel coolers

Low noise coolers

Corrosion resistant

Super efficient

Multi pass

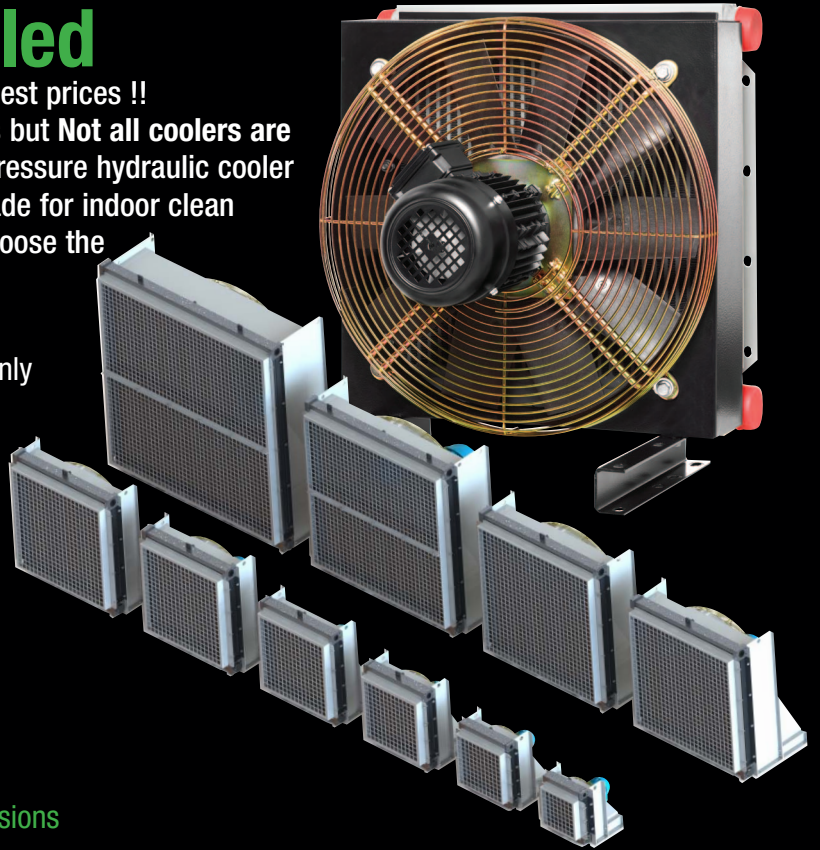

Integral pressure relief & by-pass valves

Fan usage controlled by temperature switch

Custom coolers made in our manufacturing facility.

Coolers cleaned –serviced & pressure tested

Our Catalogue lists all models, performance and dimensions

OIL COOLERS water cooled

Shell & Tube coolers with oil through the shell and water through the tubes.

We know these coolers- it's what we make -it's what we do

Our coolers are built to last and designed for ease of maintenance.

let us quickly select the best cooler for your job.

Salt water & Fresh water coolers

Removable tube bundles for easy cleaning

No anodes need replacing ever so no costly forgetful mistakes

Fully floating tubes for no cracking or tube leaks from differential expansion

High temperature versions

Mining specification versions

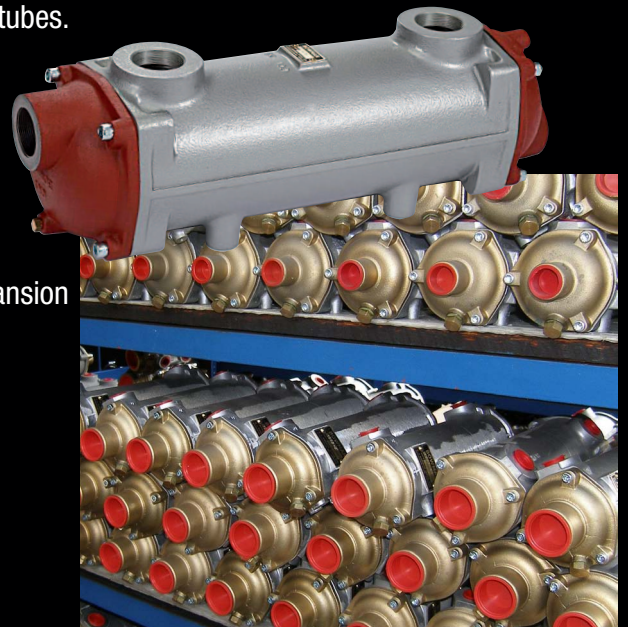

Custom designs manufactured by us

Cleaning, De-scaling & testing service

Fitting advice and instructions

Heat exchanger problem solving

See our catalogue for models, performance & dimensions
